

WORLDSKILLS CONFERENCE PROGRAMME

WHAT IS WORLDSKILLS?

WorldSkills is the global hub for skills excellence and development. Through international cooperation and development between industry, government, organizations, and institutions, we promote the benefits of and need for skilled professionals through grass-roots community projects, skills competitions, and knowledge exchange. We show how important skills education and training is for youth, industries and society by challenging young professionals around the world to become the best in the skill of their choice.

Founded in 1950, WorldSkills is a global organization that promotes vocational, technological and service oriented education and training. We promote skilled careers in 74 Member countries and regions, all working with youth, educators, governments, and industries to help prepare the workforce and talent of today for the jobs of the future.

WHAT IS THE CONFERENCE PROGRAMME?

The WorldSkills Conference Programme is designed to bring leaders together from around the world for a productive, informative and eye-opening programme with the WorldSkills Competition as its centerpiece. This programme will bring you face-to-face with the leaders of today and tomorrow in global industries, while providing customized opportunities to network with the policy makers of today in addressing current global skills issues.

As part of the 43rd WorldSkills Competition in São Paulo, Brazil, we would like to extend an invitation to all worldwide leaders to come to Brazil and participate in the Conference Programme.

WHAT IS THE WORLDSKILLS COMPETITION?

The WorldSkills Competition occurs every two years and is the biggest vocational education and skills excellence event in the world that truly reflects global industry. The Competitors represent the best of their peers and are selected from skills competitions in WorldSkills Member countries and regions, all around the world. They demonstrate their abilities both individually and collectively to execute specific tasks for which they study and/or perform in their workplace.

One of the main legacies of the WorldSkills Competitions is to give visibility and importance to professional education, as one of the true tools of socioeconomic transformation.

The Competition also provides leaders in industry, government and education with the opportunity to exchange information and best practices regarding industry and professional education. New ideas and processes inspire school-aged youth to dedicate themselves to technical and technological careers and towards a better future.
